

## **AES GLOBAL PROVIDES ADS-B OUT DESIGN AND CERTIFICATION**

**(Braintree, UK – 17 July, 2018)** – Aerospace Engineering Solutions (AES Global), a UK based aerospace design and certification organisation, is delighted to announce it has been awarded Automatic Dependent Surveillance-Broadcast (ADS-B) Out upgrade program for a major European operator.

Under the terms and agreement, AES Global will provide a full turnkey design and certification solution for Boeing 737, 757 and 767 aircraft.

With the ADS-B Out equipage mandate requirement of 7<sup>th</sup> June 2020 (Europe) for retrofit installations, AES Global will be expanding this modification to cover additional aircraft types.

Anton Heissig, Director and Head of Design for Aerospace Engineering Solutions said:

“As the mandate date draws closer, operators need to consider heavy maintenance schedules for their fleets and equipment manufacturers timelines as these will drive the window of opportunity to modify each aircraft.

“This upgrade has generated significant customer interest in recent months. We are delighted to provide ADS-B kits and installation support and continue to work on offering our customers cost-effective solutions.”
