

INTERESTED IN JOINING US? GRADUATE DESIGN ENGINEER

AES Global is an approved EASA Part 21J and a GCAA Part 21 Design Organisation Approval (DOA) holder. We design and integrate engineering modification programs on commercial aircraft for airlines and aircraft leasing companies worldwide.

AES Global's engineering department is responsible for assessing the viability of a proposed project and progressing it from the initial enquiry through the design, verification and certification process, ensuring the modification complies with all regulatory frameworks required by the European Aviation Safety Agency (EASA).

A Graduate Design Engineer will be involved in designing modifications for integration of structural/electrical systems (i.e. seats, monuments, IFE) as well as associated structural provision onto commercial aircraft.

Entry criteria will be candidates achieving a 2:2 level or higher qualification in Aerospace/Aeronautical Engineering or Mechanical Engineering Degree. On the job training will be provided.

AES Global are looking for graduates that have the will to succeed, show consistent enthusiasm, adaptability and who want to learn by becoming an integral part of the AES team.

We look forward to reviewing your application.
